► Applications

- Fixed PA installations
- Sports venues
- Athletic fields & football stadiums
- Live concerts
- Clubs & Discotheques
- Theatre

The MBK300S is a flying system for the FX series loudspeaker cabinets, allowing safe and stable mounting for a FX3.15 cabinet to any type of ceiling or other supporting structure.

The set consists of the MBK310 fly frame which has to be mounted against the ceiling and is the base frame for supporting the entire structure. The suitable side panels for mounting to the loudspeaker are supplied. Using the connection board set, an incline angle between 20° and 60° in steps of 5° can be selected.

The construction of all parts is made out of corrosion resistant zinc-plated steel with a thickness of 3 mm. Additionally, a black powder coating provides further elements resistance.

All required accessories for mounting and securing the loudspeakers onto the base frame are included in the MBK300S set.

► Specifications
