- Microphone input with studio-grade ULN technology
- Monitor function with master/PFL mix option
- Precise peak-hold level meter with dedicated PFL bar graph
- BNC gooseneck Lamp socket
- Gold-plated RCA connectors for highest signal integrity
- 3-Year Warranty Program*
- Conceived and designed by BEHRINGER Germany

The PRO MIXER DX626 is a professional high-quality 3-channel DJ mixer with integrated Beat-Per-Minute (BPM) counter, and embodies a proven 3-channel design loved by DJs worldwide – beginners and professionals alike. Its super-smooth, dual-rail “Ultraglide” crossfader with up to 500,000 life cycles guarantees years of flawless performance.

Numerous features, such as 3 dual-input stereo channels, with Gain and 3-band kill EQ (-32 dB); one channel switchable to studio-grade ULN microphone input; and manual Talkover function, enable you to work in completely new and imaginative ways. Additional features include PFL function with a Master/PFL mix option and a peak-hold Level meter with a dedicated PFL bar graph. There is also a BNC gooseneck lamp socket. The DX626 is extremely easy to use – giving you free rein over your creativity.

Super-Smooth ULTRAGLIDE Faders

The DX626 features our super-smooth channel faders, which provide amazingly high-precision level setting – and a VCA-controlled optical crossfader for the ultimate in reliability and state-of-the-art audio performance. The incredible PRO MIXER DX626's channel faders are rated for heavy use – at up to 500,000 cycles!

Features Galore

Because your voice is your instrument, the DX626 features a dedicated Mic Input with a built-in manual Talkover function that allows you to bring down the volume of the music track (referred to as "ducking"), so your voice is always out front. Vocal fine-tuning is handled by the onboard 3-band EQ, which provides up to 15 dB of boost or cut at Low (80 Hz), Mid (2.5 k), and High (12 kHz) frequency centers – for an extremely broad tonal palette. Equipped to handle any conceivable input source, these channels accept everything from line level, phono, CD and tape decks, to mp3 and minidisk players.

Dual Auto BPM Counters

Sync'ing up tracks is an art unto itself – that's why we gave the DX626 dual Auto BPM Counters. This cool feature helps take the guesswork out of making a smooth transition from one track to the next. Each BPM counter's digital display shows which channel it is tracking and the tempo of the music in beats per minute. Optionally, you can push the Beat Assist button in time with the song to manually enter the tempo. You get a readout of the tempo difference between the tracks, as well as a visual confirmation when they are in sync. These tools will help you seamlessly align two tracks – without having to rely solely on your ears.

Compose. Record. Mix. Share.

Tracktion is one of the world's fastest and easiest Digital Audio Workstations (DAW) for composing, recording, editing, mixing and sharing your music with the world. Featuring a single-screen interface, and pushing the envelope in design elegance, Tracktion brings together outstanding Pro DAW features, such as dynamic automation, unlimited track count, MIDI recording and support for VST and AU plug-ins. This powerful music production software gives you all the tools of an entire professional-grade recording studio. Learning a DAW has never been easier, thanks to their vast and readily available library of resources.

Highest Quality Sound

None of the above-mentioned features would amount to much, if the PRO MIXER DX626 didn't sound truly phenomenal. That's why we equip each one with our tried-and-true ULN (Ultra Low-Noise) Mic Preamps – what goes in comes out all its pristine glory! With the DX626 in your rig, you always get maximum headroom, with extremely low-noise and ultra-transparent sound.

Compare it to the competition for sound quality, features and value – and you'll see why more and more DJs are making the move to the PRO MIXER DX626. Drop by your local dealer, or order your incredible DX626 today!

You Are Covered

We always strive to provide the best possible Customer Experience. Our products are made in our own factory using state-of-the-art automation, enhanced production workflows and quality assurance labs with the most sophisticated test equipment available in the world. As a result, we have one of the lowest product failure rates in the industry, and we confidently back it up with a generous.
